Full-Stack Software Developer

A creative and reliable music enthusiast turned into a software engineer with several years of customer service experience. Driven by growth, and turning ideas into reality.

Software Experience

PROJECT BOOKMARKS BAR: GROUP | HTML | CSS | JAVASCRIPT | NODE JS | EXPRESS JS | MONGODB | HEROKU

- An academic resource hub that organizes docs for quick and easy access. Project was made by and for GA students.

- Accomplished works: Models association, Grid Layouts, and Full CRUD implementation.

- Learned and strengthen my knowledge on Express JS and Mongoose

PROJECT COMIC COLLECTOR: SOLO | HTML | CSS | PYTHON | DJANGO | POSTGRESQL | AWS | HEROKU

- Solo concept where users can create a profile and collect comics. Along with data-association models and image upload with Amazon Web Services.

- In crunched time, delivered full CRUD functionality on both models. Used Django's features signals to automatically create a profile when a user gets created.

- Sharpen CSS skills

PROJECT HOMECHEF: SOLO | MONGO DB | EXPRESS | REACT | NODE JS | SASS

- A food delivery app. Providing a platform for users who want to start their own business, or perhaps just want to grab a bite from their local chef.

- Developed a MERN Full-Stack app, created data-associated models and used ES6 & React16+.

- Embellish the idea, on doing more with less. Being different from the market.

Experience

MARKETING ANALYST: CSUN FIVE OF FIVE ENTERTAINMENT; NORTHRIDGE, CA | 2019–2020

- Weekly Reports: creating content that resonated with our audience which led to more responsive interaction.

- Promoted events, managed budgets increasing efficiency and productivity.

Skills

- HTML | CSS | SASS | Javascript | JQuery | MongoDB | Python | Django | React | SQL

Education

Cal State University Northridge, Northridge, CA – Music Industry Studies, Spring 2020

General Assembly - Software Engineering Immersive, Online July 2021-Oct 2021
